## Research Opportunity at Cambridge and Oxford

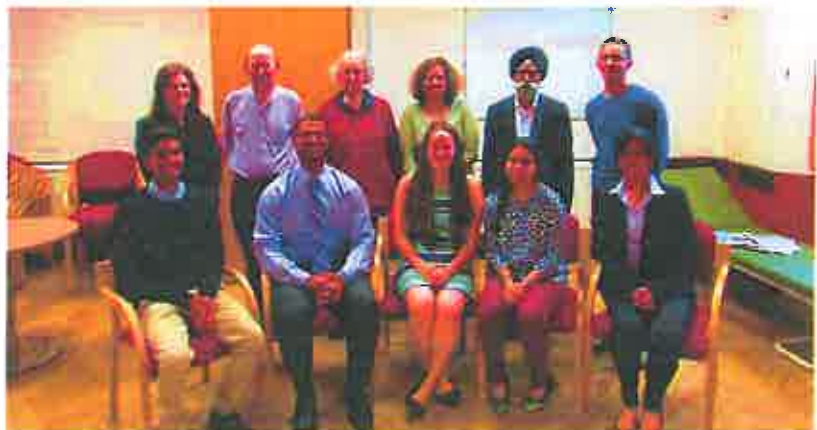

An opportunity to work with world-renowned scientists at the Universities of Cambridge and Oxford, UK for an intensive 10-week summer experience in their laboratories.

In addition, students take part in exciting experiential learning opportunities including facilitated visits to iconic academic and cultural institutions and participation in presentations and events. The selected UB students, and the faculty mentors at Cambridge and Oxford hosting them, would be involved in finalizing laboratory assignments for each individual student.

### Benefits

- An unprecedented opportunity to engage with faculty at two of the world's topmost institutions
- Deep research experience in cutting edge fields
- Exposure to, and networking with, world-renowned scholars including Nobel Laureates
- Pathways to graduate studies at Cambridge, Oxford and other prominent institutions
- Participation in an institutional initiative with exciting growth potential
- A competitive edge for national and international scholarships and fellowships
- Program dates: either June 2 - August 10 or June 9 - August 17, 2019
